

BS5609 Compliant Labels

The need for printing BS5609 Marine Grade signage is growing. Cobra Systems has solutions: VnM SignMaker printers can create 1" to 9" vinyl signs and labels for all types of visibility. All our inks and vinyls have been tested for durability and certified to be BS5609 compliant. Our VnM SignMaker printer by Cobra Systems and it's supplies, are the perfect solution for all of your marine grade signage needs. Here are just a few benefits of our media.

Applications:

Vessel Facility Signs
OSHA/ANSI Signs & Labels
Fire Extinguisher Indicators
Floor Markings

Vessel Pipe Markers
Placard Liquid Indicators
Electrical Panel Labeling
RTK & GHS Labels

Container Barcoding
First Aid Kit Indicators
Temporary Closure Signs
Lot Numbering

What is a BS5609 Certification?

BS5609 is a British marine standard adopted globally that governs the labeling of hazardous chemicals shipped by sea. BS5609 is one of several requirements included in the International Maritime Dangerous Goods (IMDG) Code. Ink ribbon and label material must be approved as a combination. Certification confirms it passed the marine immersion (salt water), weathering (UV exposure), temperature cycling and abrasion testing.

Why a VnM SignMaker printer?

- ✓ Fast
- ✓ Easy-to-Use
- ✓ Cost Effective
- ✓ No PC Needed
- ✓ Lifetime Warranty
