Our VnM® Eco-Friendly Vinyl Tape is an environmentally safe solution for all your signs and labels in any workplace. During the lifecycle of this material, this vinyl will remain environmentally friendly.

Similar in appearance to our VnM® Premium Vinyl, the VnM® Eco-Friendly Vinyl Tape is manufactured from green base materials and its composition carries many green properties.

Our VnM® Eco-Friendly Vinyl Tape does not contain any PVC or plasticizers, such as phthalates, nor do they contain any lead chromate color pigments. This Eco-Friendly Vinyl Tape is also produced in a water-based adhesive system that prevents from solvent vapors being released during its lifecycle and combustion (also known as VOC's).

The VnM® Eco-Friendly Vinyl Tape is REACH and ROHS compliant.
