- Min. application temp: 40°F
- Service temperature range: -50°F to 220°F
- Shelf life (unused): 1 year
- Resistant to smears, chemicals, UV, and water

Our VnM® Glow-In-The-Dark vinyl media is a high-performance photoluminescent vinyl primarily for interior applications in need of luminous safety signage and markings. Our media recharges by day (or another light source) and will provide up to 10 hours of glow at a full charge. VnM® Glow-In-The Dark vinyl media is dimensionally stable and offers excellent resistance to chemicals and stains. No radioactive materials are used in the manufacturing of this product and it may be safely disposed of in a sanitary landfill.

Power outages in the workplace are safety hazards. Preventing problems that can arise from such outages may save you and your employees from injury and hardship. Our Glow-in-the-Dark vinyl media is manufactured using the latest technology in photoluminescence to provide enough illumination in walkways, stairways, entrances and exits for a safe exit path. When properly applied to a clean, dry surface, our Glow-in-the-Dark vinyl media will remain effective for up to 6 years.
